## About SKF Group

The SKF Group has over 100 manufacturing sites worldwide, sales companies in 70 countries, representation in 130 countries, making it a truly global company. In addition, our global distribution system with distributors and dealers in over 15,000 locations around the world and an e-business marketplace puts SKF close to customers for the supply of both products and services. In essence, SKF solutions are available wherever and whenever customers need them.

SKF in India has a pan India footprint comprising of six manufacturing facilities, six offices, over 300 distributors and an employee base of over 3,300 dedicated professionals. SKF Vehicle Service Market deals with the aftermarket for cars, two wheelers, three wheelers, tractors and commercial vehicles across India. As a knowledge engineering company, SKF is much more than a components supplier — our engineers fall back on a century of SKF expertise to improve overall system reliability, safety and efficiency.

A man with a beard, wearing a blue and white plaid shirt and blue jeans, is smiling and touching the door handle of a white truck. The truck is parked outdoors under a clear blue sky. The man is looking towards the camera. The truck's door is partially open, and the man's hand is on the handle. The truck's wheel and fender are visible in the foreground.

## Increase your reliability, sustainability and profitability

With decades of close cooperation with leading truck and trailer manufacturers and their component suppliers, SKF understands the issues that drive your business. Since the birth of the trucking industry, SKF bearings have set the gold standard for performance in engines, gearboxes, drivetrains and wheel ends. We have pioneered many industry firsts, from unitized truck hubs to advanced sealing systems that have redefined expectations for component service life. SKF is able to take a systems approach to design to keep you at the forefront of developing technologies.

## Bearing kits for light and medium commercial vehicles (LCV/MCV segments)

## About SKF Group

The SKF Group has globally over 100 manufacturing sites worldwide and sales companies in 70 countries and representation in 130 countries, SKF is a truly international corporation. In addition, our global distribution system with distributors and dealers in over 15, 000 locations around the world and an e-business marketplace puts SKF close to customers for the supply of both products and services. In essence, SKF solutions are available wherever and whenever customers need them.

SKF in India has a pan India footprint comprising of six manufacturing facilities, six offices, over 300 distributors and an employee base of over 3, 300 dedicated professionals. SKF Vehicle Service Market deals with the aftermarket for cars, two wheelers, three wheelers and commercial vehicles across India. As a knowledge engineering company, SKF is much more than a components supplier — our engineers fall back on a century of SKF expertise to improve overall system reliability, safety and efficiency.

## Catering to the world's largest four wheeler market

A trusted partner of major four wheelers manufacturers, SKF is ever striving to reach customer expectations as a 'one-stop supplier' by supplying chain and sprocket, clutch plates, needle roller bearings, one way clutch, sintered products, steering race kits, and oil seals. With decades of experience and expertise, SKF aftermarket products are customised for Indian roads.

## About SKF

The SKF Group has over 100 manufacturing sites worldwide, sales companies in 70 countries, representation in 130 countries, making it a truly global company. In addition, our global distribution system with distributors and dealers in over 15,000 locations around the world and an e-business marketplace puts SKF close to customers for the supply of both products and services. In essence, SKF solutions are available wherever and whenever customers need them. SKF in India has a pan India footprint comprising of six manufacturing facilities,

six offices, over 300 distributors and an employee base of over 3,300 dedicated professionals. SKF Vehicle Service Market deals with the aftermarket for cars, two wheelers, three wheelers, tractors and commercial vehicles across India. As a knowledge engineering company, SKF is much more than a components supplier — our engineers fall back on a century of SKF expertise to improve overall system reliability, safety and efficiency.

## What do today's customers want?

Higher fuel efficiency. A quiet , comfortable ride. No downtime. Less maintenance. And an array of active and passive safety features.

SKF products are designed to meet such customer requirements and offers a wide range of bearings that are the best performance fit for your application. With more than 100 years of experience , SKF not only provides components but a complete support to our customers by helping them address their critical issues - reliability , efficiency and safety.

## Supplementary designations

|        |   |
|--------|---|
| N      | Snap ring groove in outside cylindrical surface of the outer ring.  |
| NR     | As N , but with snap ring.  |
| RS1    | Contact type rubber seal with sheet steel reinforcement , at one side of the bearing.   |
| 2RS1   | RS1 seals at both sides of the bearing.   |
| RZ     | Low friction seal of synthetic rubber with sheet steel reinforcement at on side of the bearing.   |
| 2RZ    | RZ seals at both sides of the bearing.  |
| Z      | Shield (non-contact type) at one side of the bearing.   |
| ZZ     | Z shields at both sides of the bearing.   |
| ZN     | Z shield at one side of the bearing and snap ring groove in outer ring.   |
| ZNR    | As ZN , but with snap ring.   |
| ZZNR   | As ZZN , but with snap ring.  |
| TN9    | Glass fibre reinforced polyamide 6 , 6 window-type cage.  |
| HN3    | Stands for carbonitrided bearing. Performance of standard through hardened bearings can be drastically improved by the use of a surface heat treatment called carbonitriding. Carbonitriding is a high temperature heat treatment , which involves the diffusion of carbon and nitrogen into the surface of the steel. Deep Groove Ball Bearings (DGBB) with carbonitrided inner rings have been found to be twice as resistant compared to regular hardened DGBBs. |
| H      | Stands for radial clearance in the upper half of the same clearance bracket e.g. 6002/C3H , here clearance for C3 is between 8 to 23 micron but for C3H clearance is between 15 to 23 micron. CNL Stands for radial clearance in the lower half of the same clearance bracket e.g. 6304/CNL , here clearance for normal bearing is between 5 to 20 micron but for CNL clearance is between 5 to 14 micron.  |
| CNP    | Stands for radial clearance which is a combination of the upper half of normal (CN) and the lower half of C3 range e.g. 6305/CNP , here the clearance for normal bearing is between 5 to 20 micron and 13 to 28 micron for C3. Hence , CNP clearance will be 13 to 21 micron.   |
| VB133  | Chamfer in bore deviating from basic bearing.   |
| VQ091  | Close bore diameter tolerance.  |
| VB524  | Chamfer in bore and outer diameter deviating from basic bearing.  |
| VQ213  | Special tolerance for bearing vibration & peaks.  |
| MTF7&9 | Here MT stands for medium temperature grease and F7 & F9 gives the quantities of grease.  |
| GJN7   | Here GJN stands for high temperature grease and 7 for grease quantity.  |
| J      | Pressed steel cage.   |
| Q      | SKF TQ Line bearings come with a logarithmic contact profile that provides for optimum stress distribution over roller/raceway contacts. Special design of sliding surfaces of guide flange and large roller ends considerably promotes lubricant film formation at roller end/flange contacts. Resulting benefits include increased operational reliability and reduced sensitivity to misalignment.   |

## Internal clearance

The bearing internal clearance is defined as the total distance through which one bearing ring can be moved relative to the other under zero measuring load. Movement in the radial direction is called radial internal clearance; axial movement , axial internal clearance. The internal clearance is standardized.

Rolling bearings are delivered with different internal clearance. The internal clearance will vary from bearing type to bearing type. The most common clearance is NORMAL (with no suffix).

- C1 = Bearing internal clearance smaller than C2
- C2 = Bearing internal clearance smaller than normal
- C3 = Bearing internal clearance greater than normal
- C4 = Bearing internal clearance greater than C3
- C5 = Bearing internal clearance greater than C4

## Why internal clearance?

1. In order to fit a bearing tightly on shaft it is necessary that the shaft is slightly larger than the bore of the inner ring. When the bearing is mounted , the inner ring will be expanded and consequently the space available for the rolling elements will be reduced. The reduction in space available for rolling elements when the bearing is mounted is accommodated by internal clearance
2. Steel will expand with increased temperature. In operation the temperature of the various parts of a bearing will not remain uniform and resulting in varying degrees of expansion , which is compensated by the internal clearance. The internal clearance required is dependent upon the mounting fit and the operating conditions. In case of doubt a bearing with greater clearance shall always be selected.

# New improved range of high performance SKF grease

For longer service life

## High performance ULTRA PREMIUM lithium complex premium grease

VKG IP PLUS (80 000\* kilometers)

### Features:

- Lithium based multi purpose gel grease with longer life.
- Excellent water resistance properties and NLGI Grade 3.
- Outstanding shear and rolling stability in operating temperature upto 180 °C.
- Recommended for all type of automotive applications in heavy commercial vehicles, buses, tractors, earth moving or agricultural equipment and heavily loaded bearings under extreme pressure conditions.

### Benefits:

- Better life (upto 80 000 kms\*) and high performance.
- Longer service life and longer component life.
- Less vehicle downtime for maintenance and lubrication – More miles will bring more smiles.

## High performance lithium complex PREMIUM grease

VKG IP (60 000\* kilometers)

### Features:

- Lithium based premium multi purpose grease with better life.
- Recommended for all type of automotive applications in commercial and passenger vehicles, tractors, cars, earth-moving or agricultural equipment and heavily loaded bearings under extreme pressure conditions.
- Outstanding shear and rolling stability in operating temperature up to 160 °C.
- Superior water resistance properties and NLGI Grade 3.

### Benefits:

- Better life (upto 60 000 kms\*) and high performance.
- Longer service life and longer component life.
- Less vehicle downtime for maintenance and lubrication.

## High performance lithium complex PREMIUM grease

VKG IN (20 000\* kilometers)

### Features:

- Excellent rust and oxidation resistance with better water washout properties and NLGI Grade 3.
- Improved mechanical and thermal stability in operating temperature up to 120 °C.
- Meets IS 12203:2004 specification.
- More suitable for two-wheelers, three-wheelers, small cars, available in 100 g till 180 kg barrels.

### Benefits:

- Improved SKF IN grease.
- 20 000 kms\* lubrication life.

\* Under standard operating and testing conditions.
